HIGH-LIGHTS 2024

UNIQUE ATTRACTION

Zero Interiör was founded in 1978 with the vision of making unique light fixtures for a design-interested audience. These products, in combination with a deep understanding of how best to illuminate public indoor and outdoor environments, is at the heart of our identity. From the start, our creation of unique environments has been praised in both Sweden and abroad, thanks to our guiding principles: quality, environmental care and innovation. Our local roots and manufacturing have built long-term relationships with customers and suppliers that are vital to us. More than 80% of manufacturing takes place within roughly 200 km of Nybro in Småland and all assembly occurs in our workshop in Nybro.

A LIGHT

Now it's the world premiere for a light, a new pendant luminaire that doesn't dazzle. It's been named A LIGHT. A pendant with an infinite variable where the outer and inner shades can be varied or where both shades can be painted in the same color.

The inner shade receives its surface softly illuminated, while showing itself active and spreading an elegant and warm atmosphere. The minimally cut slits on the upper side of the outer shade spread a soft streaming light upwards.

A LIGHT is the light that thrives well in all types of environments and can be hung individually or in groups. In the hotel entrance, restaurant, at the office, in the store, at home, or wherever you think it looks best. A LIGHT has a built-in LED module with the possibility of DALI.

Design Jens Fager 2024

CURVE CLUSTER

Curve is a collection of lamps that, with their organic shapes, give the impression of growth and adapt to their surroundings. The pieces in the collection mimic the organic development of a sprouting plant or mushroom, starting from a small and sturdy base.

The most recent addition, Curve Cluster, features three branches bundled together to form a pendant lamp. Curve Cluster can function as a standalone light or be combined with multiple pieces to create an organic chandelier. The lamp can also be customized with either lamp shades in painted metal or glass globes in different sizes.

HOOP DROP

HOOP LARGE

We're introducing two exciting new options: a sleek drop-formed design and an XL version. These additions offer fresh expressions and expand the versatility of the Hoop family, making them even more suitable for your projects. Whether you prefer a single pendant or want to create striking group installations, these new extensions will elevate your design possibilities.

LUMO CEILING

LYX

LYX was created with the vision of adding that extra, something exclusive, something beyond the ordinary to urban spaces. It is a luminaire that celebrates light by allowing it to break, sparkle, and gleam in beautifully polished prisms, resembling the spring sun on glittering fresh snow. LYX is not the type of post luminaire that eyes avoid to protect night vision; it is something one seeks with the gaze, a beautiful and mood-setting ornament.

Design Jan Forsmark 2024

SPRINKLE WALL & CEILING

We are proud to present the Wall and Ceiling fixtures to the Sprinkle family. The Wall Plafond is not just a light source; it's a distinctive element that commands attention and adds character to any interior. It's circular shape captivates the eye, showcasing light artfully layered between Sprinkle's characteristic round slats. The ceiling fixture plays a leading role in any setting, acting as a focal point that guides the gaze towards its center. A contemporary fixture that elegantly aligns with the ceiling, setting the tone for the entire environment. With these new additions to the Sprinkle series, we blend functionality with aesthetics, delivering lighting solutions that not only illuminates the space but also enhances its ambiance.
